a) Location of the Mucoviscidosis Center at the Dead Sea

The distance between Tel Aviv international airport and the mucoviscidosis center is approximately 2,5 hours by car. It is located in the Negev desert directly by the Dead Sea (400 meters below sea level). The clinic is integrated into the DMZ contract house Lot.

b) Therapy / Medical Range

Both the treatment program and the medical and psychological care are supervised by a CF specialist from Germany who is at the mucoviscidosis patients' disposal for the entire time. The CF specific physiotherapy is implemented by team of therapists. On top of that the entire team of the DMZ clinic is available to care for the patients. Additionally the following courses are offered: Therapeutic postures, chest mobilisation, modified autogenic drainage (MAD), physical positions to ease breathing. Depending on their health patients participate in activities such as beach jogging, hiking, cycling, volleyball and gymnastics. Psychological and nutritional counselling are also available. With regard to nutritional counselling classes on „High Caloric Diets for CF“ are being held.

c) DMZ Doctors at the Dead Sea / Head Physician / Hospital Facilities

Here at the Dead Sea an experienced team of doctors and a team of experts consisting of specialists for internal medicine, a CF specialist, physiotherapists, a nutritionist and psychologists is available for the treatment of mucoviscidosis. In order to provide general care there are experienced members of our staff at your disposal during the daily office hours.

d) The IP-DMZ Hospital Facilities are Located in the Lot Contract House

Additionally, we provide several hospital facilities which are solely reserved for the treatment of mucoviscidosis as well as an extensive health center (spa) with a Dead Sea indoor pool and a physiotherapy department (massage, mud packs, sulphur etc.). This spa is located in an auxiliary building.

e) Capacity / Appointments and Residence Time

The mucoviscidosis patients are accommodated in the IP-DMZ contract house Lot. A total of 50 rooms is reserved for this department. The residence time is 21 days. The treatment period is from november to march.

f) Cost Absorption by Health Insurance

The treatment of mucoviscidosis in the Dead Sea region is recognized by statutory health insurances. IP has reached compensation agreements according to § 111 SGB V with the appropriate health insurance associations.
